

Working of application

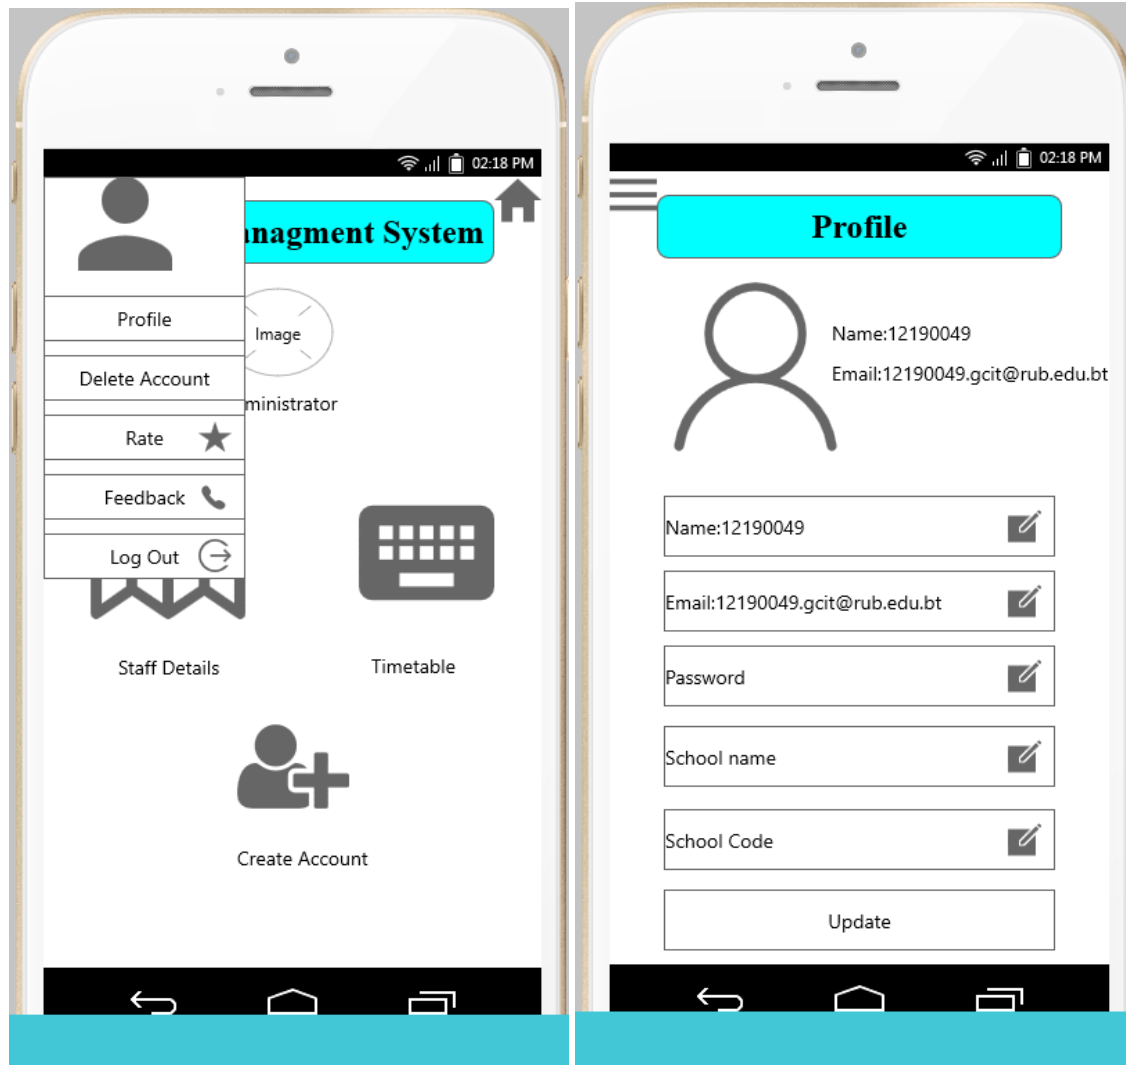

This app consists of two users i.e., Administration and Teachers. The administration will be one from particular school and teacher user will be those who were employee to this particular school. All the necessary things like CRUD will be perform by admin and also teacher can perform CRUD if necessary (E.g. Editing profile). The admin can create account by himself and after completion of account creation. Then the admin will to access three main features i.e. Staff details, timetable and create account. Staff details means all the teaching staff and non-teaching staff details should be recorded. (e.g., Subject, Class teacher and so on.). In case of timetable, the admin has to update the timetable for individual teachers and classes. And for create account means the admin has to create account and sent through phone or email those who were register to particular school.

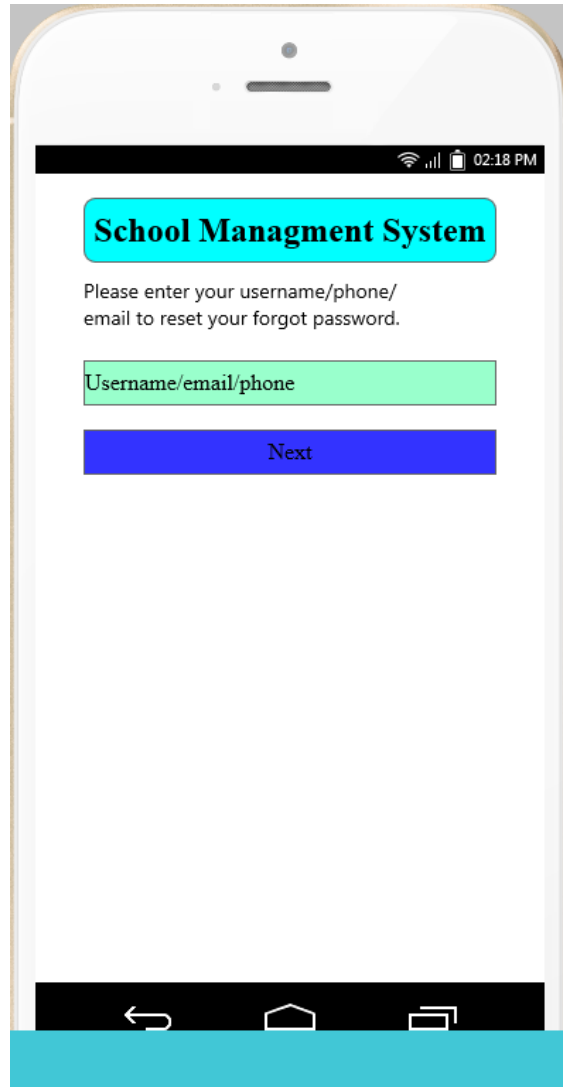

The teacher users can access of two features i.e. Timetable and staff details. The teacher will be see his/her timetable for the classes and he/she can also view details of other teachers who were teaching of same class.
